

TURNADO STANDARD ACCESSORIES 2018

- **We have been selling the combo machines for 35 years, but recently we have had a lot of requests for a lathe only from people who have bought small CNC Mills. Most of the CNC lathes on the market are either very small and limited in their capability or production machines that are very expensive. Our lathe has a huge 17" diameter swing, 30 " between centers, a 1.5" spindle bore and 2HP VFD motor. Combined with the USA MADE Gecko drives and the Mach 3 software it offers a huge amount of machining capability at a very reasonable price. The lathe is equipped with DRO STANDARD and can also be operated in a fully manual mode.**

The machine comes fully equipped with the list of accessories shown below and is ready for shipment to you by truck freight. The machine comes with our standard FULL 3 YEAR WARRANTY.

VARIABLE FREQUENCY (VFD) SPINDLE DRIVES

2 HP 3 PHASE SPINDLE MOTOR

BUILT IN 3 PHASE INVERTER

ST 98 CI 4 AXIS STEPPER DRIVEN CNC SYSTEM
